Core business : Quarry and Mines in terms of Consultation, Project Planning and Contractor

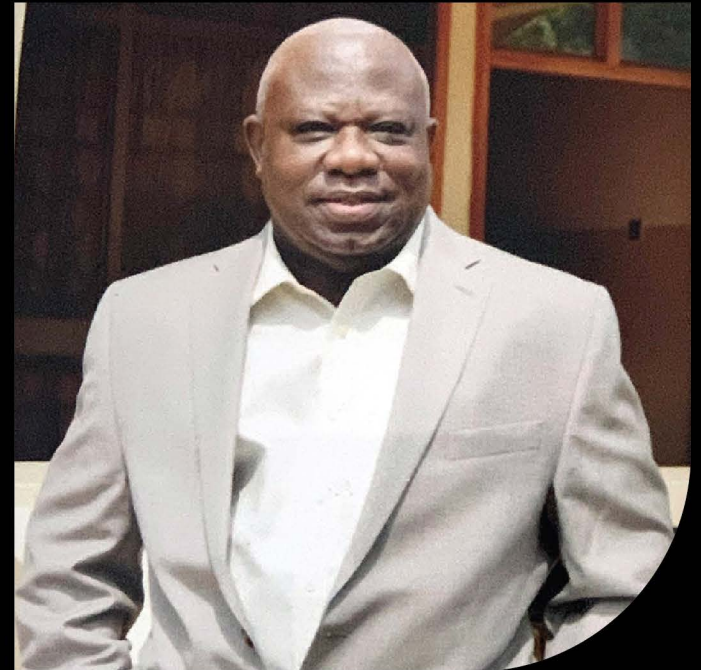

ABOUT THE FOUNDER

Mr. Andrew Bruce- Cathline is an Electromechanical Engineer by profession and has over 40 years of working experience as an Engineering infrastructure consultant in his own company – Derby Company Limited.

Before establishing Derby Company Limited, Mr. Bruce-Cathline previously worked with Ghana Broadcasting Corporation (GBC) TV – Telecine as a Senior Electromechanical Engineer from 1975 to 1979. He subsequently went to London for a couple years before coming back to Ghana to establish his company -Derby Company Limited in January 1986 and thus become the Managing Director/CEO.

Mr Bruce-Cathline started Derby Company Limited from a humble beginning with its initial funding from savings accumulated from previous employments and benevolence from family and close friends in its formative stages. Derby company limited offers engineering infrastructure consultancy services with its core business geared towards promoting infrastructure project developments in Ghana.

In 2022 he established the Derby Resources Ghana Limited as a separate company focus on mining, report and refinery service as President and Chairman.

DERBY RESOURCES GHANA LIMITED

That is what we do – we move tons of rock, earth, coal, mineral ore and most other mining, support services and industrial by-products.

OUR VALVES

We are qualified, skilled and committed. We set ourselves high standards, both ethically and in our work, and we value excellence in all that we do. In our behaviour, professionalism means that we:

- Take personal responsibility
- Show pride in our appearance, language and conduct
- Display positive attitudes
- Work together as one team
- Show respect to all

OUR MISSION

We contribute to the strategic success of our clients by providing ethical, innovative, functional and technologically advanced solutions, by collaborating with well-positioned expert networks and by providing ownership value and growth opportunities to our staff.

OUR VISION

We are independent consultants providing world-class geological and mining services in mineral resource management.

ACQUISITIONS

Derby Resources Ghana Ltd that it has acquired;

- i. Large Two (2) Nos Gold Manganese Ore, Concessions in the Northern Region of Ghana
- ii. Six (6) Now Lithium Ore Mining in the Abura Dunkwa Western Region

SERVICES

MINING/MINING SERVICES

General mining services include underground and surface drilling, blasting, mineral assaying (geochemical and precious metals analysis), sample preparation, underground mining, exploration drilling, loading and hauling services, handheld mining, and shotcrete/fibrecrete services. This last type is a specialized form of concrete service that prevents smaller rocks from working loose from a rock face, replacing the conventional meshing and bolting methods.

GOLD REFINERY

We provide refinery service where gold is separated from other metals or residues. In other words, it is where it gets refined. We work with scrap precious metals, and recycle them through the process of refining, separating them into their pure forms, and repurposing them.

GOLD OF EXPORT

We provide ideal and secure private Gold Trading and Export in the industry, enabling investors to buy and export precious metals with confidence and total security.

We will walk you through a simple procedure for potential gold exporters

MINING SUPPORT SERVICES

Our Mining support service provide support services to mineral right holders, including drilling and blasting services as well as the supply of mining equipment and spare parts.

CARBONATE MANGANESE ORE

We mine Manganese(II) carbonate is used as an additive to plant fertilizers, glaze colorant in ceramics, pigment and drier for varnishes. It is also used as an ingredient in welding rod, animal feed additive as well as to prepare other manganese salts and pharmaceuticals.

MINING

We mine; extract of valuable geological materials from the Earth and other astronomical objects. Mining is required to obtain most materials that cannot be grown through agricultural processes, or feasibly created artificially in a laboratory or factory

HEALTH & SAFETY

We envisage injury-free production as a result of safe working environments for all employees. To this end, we ensure that our employees are up to date with the latest safety standards and procedures. Operationally, we are committed to:

- Implementing our own internal safety systems, in addition to mine-specific safety systems
- Placing our employees' health and safety above all else
- Continually training our employees to work safely and securely
- Adhering to our clients' on-mine safety requirements; and
- Abiding by the regulations of the Mine Health and Safety Act.

QUALITY POLICY

Derby Resources Ghana Limited prioritizes safety and regulatory compliance by providing ample resources for maintaining its Quality Management System. Its management and staff are responsible for ensuring a safe work environment and the prevention of injury and illness. The company values communication, training, and development, as well as regular progress reviews to achieve its objectives.

- Regulatory Compliance - We adheres to relevant statutory and regulatory requirements, as well as codes of practices and approved guidelines.
- Communication - The Company ensures that information about its objectives is disseminated to all stakeholders for effective communication of its activities.
- Training and Development - Contractors undergo specialized job training following a comprehensive review process.
- Progress Review - Regular internal and external audits of management and fiscal processes are approved to monitor progress.

ENVIRONMENTAL MANAGEMENT

At Derby Resources Ghana Company Limited our safety compliance system ensures that we contribute to a zero-harm environment. Each site manager and supervisor compiles a safety roster for the month ahead, featuring predetermined safety indicators.

We also conduct monthly audits – both surface and underground – to measure compliance.
